

## Invitation

# The Global Cleantech Summit 2015

Helsinki | Finland | 8–10 September

*Dear Sir/Madam,*

We all need growth, and the more we need Green Growth. Clean technologies and common technological roadmaps are required between East and West, North and South. As a forerunner in innovations, Finland is set to provide facilitation in seeking cleantech solutions for green growth globally. As a part of this creative yet carefully engineered process The Global Cleantech Summit will be organized in Helsinki this autumn.

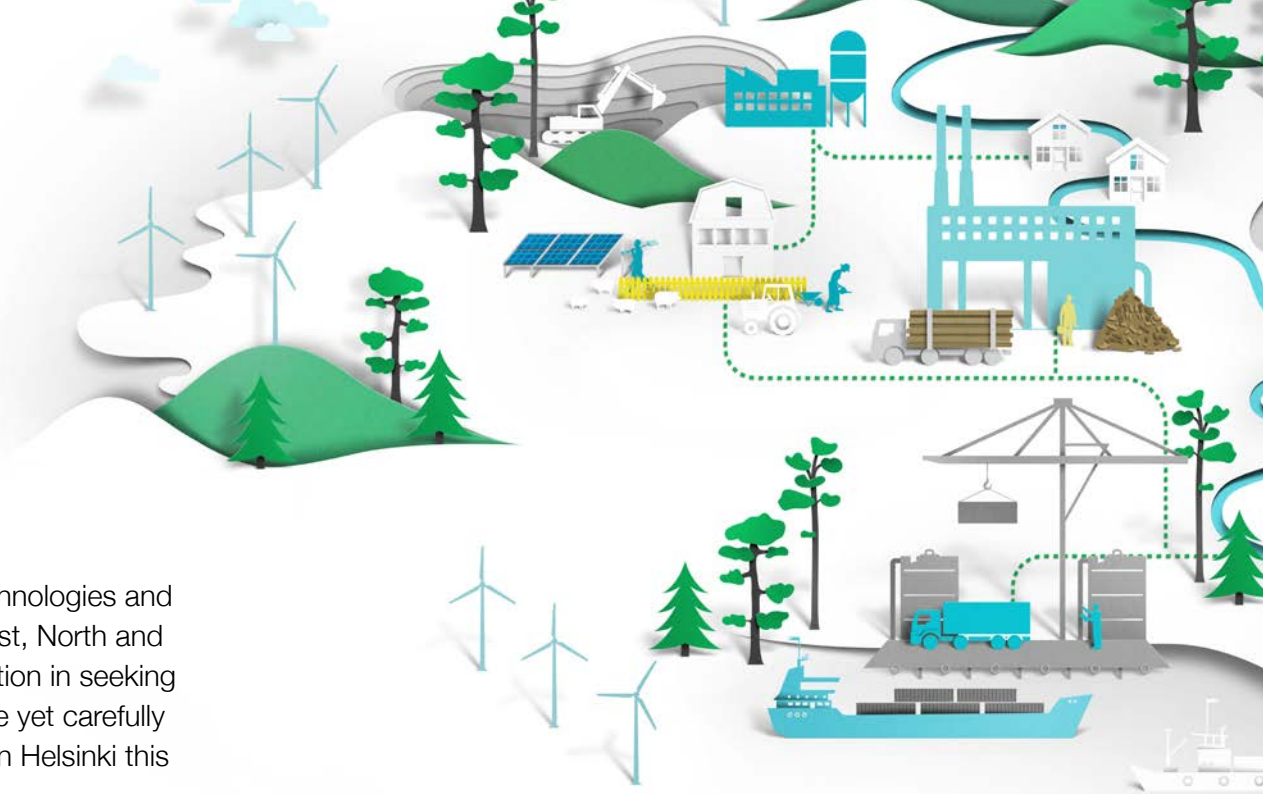

The event gathers together political decision makers, cleantech companies, specialists and investors. And it's all about the possibilities of clean technology: recent innovations, success stories, challenges and new ideas.

*You are most warmly welcome to the Global Cleantech Conference on 9 September and Cleantech Innovations in Minerals Production and Smart Visits on 10 September.*

Join us on the journey. Witness how a global and virtual brainstorming culminates in a summit, where the next steps are agreed upon.

You are most warmly welcome!
