

AFRICAN UTILITY WEEK 2016

JOIN
US!

The Dutch Climate Solutions Project, Netherlands Water Partnership and the Netherlands Consulate General in Cape Town would like to invite you to join the Holland Activities and Pavilion at the African Utility Week (AUW), showcasing Dutch capabilities on the water-energy-food nexus.

African Utility Week | 17-19 May 2016 | Cape Town International Convention Centre

All over Africa, utilities are facing huge challenges in terms of (future) availability of energy, food and water. Agricultural food production and energy production are by far the biggest water users. Continued growth in Africa requires more water for food, for energy and for drinking water supply.

The Dutch are renowned in operational excellence in (drinking and industrial) water supply and treatment, clean tech technologies and research and policy consultancy with a large track record of assisting African utilities. Furthermore, the Dutch have blended participatory approaches with innovative technologies and partnerships to provide sustainable agro, energy and water solutions for the competing water claims of the future in Africa.

Why join

- Largest meeting place for African utilities, governments and businesses
- 250 exhibitors, 6000 visitors, 1200 conference delegates
- Position your company as part of a network of innovative experts on the water-energy-food nexus
- Build new and stronger business relationships and create visibility with a relevant audience

HOLLAND ACTIVITIES & PAVILION

- Conference Keynote by Special Envoy for Water, Henk Ovink, on the nexus approach to generate attention for Dutch expertise & presence at the AUW Expo
- Matchmaking facilitated by ECN
- Connect with sector specialists from NL Embassies from all over Africa
- Present your company in the Dutch Dragon Den session
- Network reception
- Holland Pavilion (your logo & your marketing material will be on display)
- Active media campaign positioning the Dutch expertise on the water-energy-food nexus, including a short movie detailing the Dutch expertise and the solutions the participating companies offer ([click here](#) for the example we made for Mining Indaba)
- Participation in the AUW Expo and Workshop Programme ([click here](#) for an overview of 2015 workshop programme)

Contribution is EURO 950 per company for the above mentioned offering (including access to expo; excluding conference).

If you wish to attend the [AUW conference](#), you will need to buy a delegate pass. As a participant in the official Dutch delegation you will receive a 10% discount. Delegate passes are ZAR 15.975 (approx EURO 940) for private companies and ZAR 10.206 (approx. EURO 600) for public companies.

For more info or to sign up, please contact Peter Reffeltrath from Energy Centre Netherlands (ECN): reffeltrath@ecn.nl.

WHO IS IT FOR?

Joining the collective Dutch initiative for the AUW is especially interesting for the following Dutch organizations:

- Engineering and consultancy companies
- Suppliers of equipment of renewable energy technologies
- Suppliers of equipment for improved water efficiency
- Research institutes, active in nexus approaches for planning and implementation
- Representatives of utilities and water boards, active in international projects

Delegates of the AUW will come from all over Africa, from different types of organisations:

- Utilities
- Governments
- Private companies
- International organizations

Thematic focus

1) Energy:

- Generation
- Renewables
- Transmission and distribution
- Metering and revenue cycle management
- Efficiency, embedded generation and energy storage
- Investment and climate funds

2) Water availability & water resources:

- WRM: water availability, source supply
- Water scarcity, LT investments: water stewardship

3) Utility management & operations

- NRW, water losses, metering, monitoring
- Water & energy, technological & nexus approaches, future avenues
- Sanitation/Waste water & energy, waste to energy
- Infrastructure maintenance, asset management

4) Geographic focus:

- Sub-sahara Africa, with strong representation of Southern Africa, Eastern Africa and (English speaking) Western Africa

EXTRA INFO

About African Utility Week and Clean Power Africa

The 16th annual African Utility Week and Clean Power Africa is a global meeting place, conference and trade exhibition for African power and water utility professionals and offers a unique networking opportunity for engineers, stakeholders and solution providers alike.

Exhibition - 250 exhibitors on 12,000sqm

This trade exhibition is an important port of call for senior decision makers from utilities, governments, large power users, IPPs, consultants, contractors and regulators to source the latest solutions or to meet new clients and suppliers. Participating as an exhibitor will enable you to make crucial contacts within the African power and water industry, enter new markets and widen your network. See current list of exhibitors.

Conference - 1200 delegates

If challenges around power generation, T&D, metering, clean energy, finance, reliability, water supply or energy efficiency are keeping you awake at night, African Utility Week will be the right place to find suitable solutions, best practices and case studies from around the world.

Networking - 6000 attendees, unlimited networking opportunities

The 3-day exhibition means more engagement time between delegates, visitors and exhibitors. A more engaging exhibition floor with product demonstrations, workshops, cocktail functions, free refreshments and meeting lounges will create business opportunities for our attendees.
